Nerd Info

What's the difference between the 8086 and the 80086 processor by intel?
How does a song sound, that ChatGPT writes about itself?
And how do you count to 31 with just one hand?

In addition to this in-depth dive into content, compared to which any community college computer course might as well pack it in, **The Informatics** deliver an explosive mix of high-energy rock 'n' roll, danceable ska, punk, and rock.

The nerd punk'n'roll band celebrated their first concert online at the Chaos Computer Club Congress (rc3), and since then they haven't just been trolling the internet. They also exist in real life. On real stages. Sometimes even with a real audience.

Whether you're an introverted nerd, a hip geek, or a frustrated end user, the IT experts of The Informatics pull everyone out of their home office and reboot the crowd.

"Well-produced fun — nerd punk 'n' roll with rock 'n' roll punk, ska elements, and plenty of swing in the hips."
— OX Fanzine

Go ahead and apply for educational leave now and join the authentic nerds of The Informatics at their next show!

Live long and prosper - and may the Force be with you.

Yours,
The Informatics
